LIFE SAVING TRAINING

FAILURE TO TRAIN PROPERLY...

Harris v Ohio

2010 for Michigan emergency responders was filled with incidents of tragedy relating to vehicle operations, scene safety and trauma exposure. As you complete your 2011 training schedule keep in mind Harris v Ohio where the courts placed a burden on government entities to train their responders to the tasks that they are expected to perform. Has your training evolved over the years or are you training to the same topics in the

same manner as you always have? Training must evolve to include updated material and techniques by experts in those areas. **2 THE RESCUE** training courses are **advanced, refreshing, affordable, invaluable** and instructed by professionals that have years of "hands on" experience in adverse conditions. Entire organizations can be trained for **\$350.00!**

Change your training mindset now and reduce your liability and **save lives!**
